

DZG Metering GmbH

Embedded Software Developer (m/w/d)

DZG manufactures a wide range of measuring systems. In addition, it offers the entire range of services such as meter management, meter repair, testing, maintenance and calibration.

DZG Metering is a leading manufacturer in the field of smart metering and develops new, innovative and trend-setting communication technologies (LoRa, BLE, IoT) not only for smart metering applications, but also for the intelligent sensor networks of the future.

Job description

We are looking for a committed developer (m/f/d) for the area of embedded development. You will work closely with the software team leader and take on highly interesting tasks in concrete customer projects. In these tasks you will work in an industrial environment in an international team.

Programming knowledge in C/C++ is an ideal prerequisite for being able to take on topics independently in a team.

Your tasks include

- Development of firmware components for Cortex-M architectures
- Development of tools for configuration and test automation
- Further development of existing products
- Setting up and carrying out tests
- Collaboration on documentation accompanying the development process

Your profile

- Successfully completed technical studies / or comparable training in computer science, electrical engineering, mechatronics, regenerative energy technology or a comparable field of study
- Good knowledge of C/C++
- Basic knowledge in C# and embedded software development
- Ideally knowledge of communication protocols such as TCP/IP, Bluetooth LE etc.
- Safe handling of MS Office programs
- Good knowledge of German and English (written and spoken)
- High level of commitment, flexibility, creativity, initiative, independence, ability to work in a team, to organise and communicate

What we offer you

- Exciting innovative development topics
- Software development in a young, dynamic team
- Flexible working hours
- Modern development tools
- Thorough training and individual support from experts
- Bringing in your own ideas

Have we aroused your interest? Please send us your application in writing:
